Universal Ground Strap SI-0958
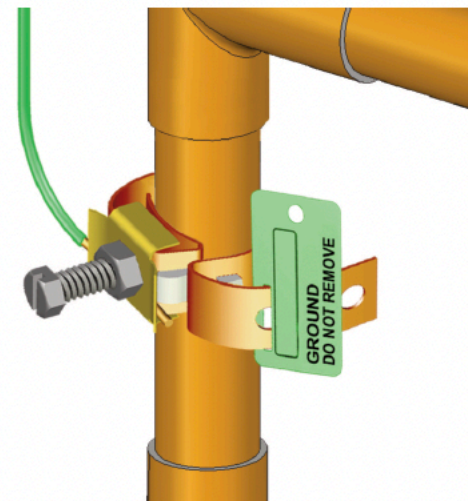

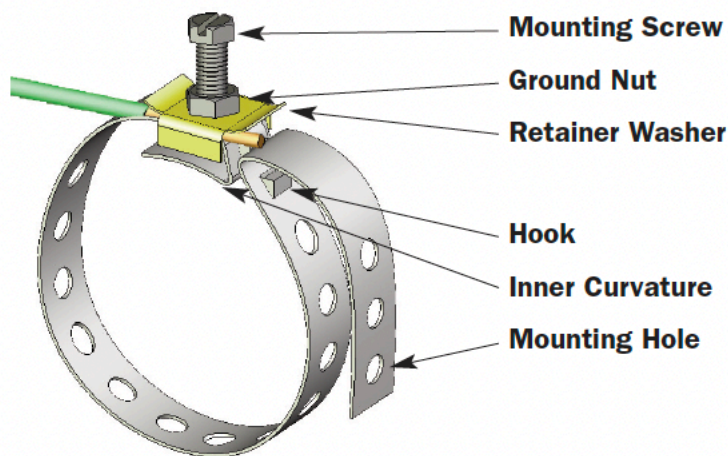

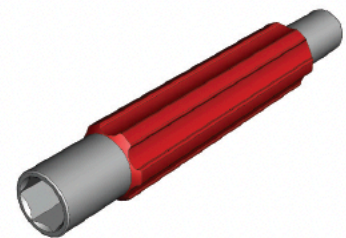

(Patented, UL & CUL Listed)

Installation Instructions :

SI-0958 Universal Ground Straps were specifically designed to upgrade and facilitate the installation of bonding a copper ground wire to a copper pipe, galvanized pipe or service mast from existing ground strap designs.

Step 1: Position ground strap inner curvature against pipe.

Step 2: Wrap ground strap around pipe and engage mounting hole on ground strap closest to side hook.

Step 3: Back-off ground nut fully toward head of mounting screw.

Step 4: Tighten mounting screw to firmly secure ground strap around pipe using SI-7195 Tool - 3/8" size. DO NOT OVER TIGHTEN.

Step 5: Insert up to a #10 AWG copper ground wire under the retainer washer and tighten ground nut firmly to secure the ground wire using SI-7195 Tool – 7/16" size.

Step 6: Back fold any excess ground strap.

SI-7195
Single Tool Installation
3/8 - 7/16" Can Wrench

- Mounting Screw
- Ground Nut
- Retainer Washer
- Hook
- Inner Curvature
- Mounting Hole
