

SI-GB-70 Premium Ground Block

MacLean Senior Industries premium ground blocks, SI-GB-70 and SI-GB-70SS, are designed to accommodate current ratings of up to a #6 ground wire per UL 467.

These ground blocks are manufactured from corrosion resistant 300 series stainless steel and have the F splice permanently affixed to the bracket, providing an ultimate bond of the CATV system outside the subscriber's location.

The ground blocks can be ordered with (SI-GB-70SS) or without (SI-GB-70) two stainless steel installation screws.

Features:

- Designed to meet SCTE 01, SCTE 05, and SCTE 146 specifications.
- F81 splice is permanently affixed to the bracket.
- Slotted grounding location allows for better visualization of the screw depth for ease of installation.
- 7/16" hex head ground screw allows for 1 tool installation.
- Accommodates #14 AWG solid to #6 AWG solid ground wires.
- #8 x 1" Phillips Drive Hex Washer Installation Screws, 1/4" hex size.
- UL listed
